About

Fondo Salute is a European cooperative **that provides and manages integrated healthcare funds**, as a result of collective agreements or contractual agreements with businesses, **to ensure health care** to workers and their families.

Fondo Salute consists of the **two main actors** in the mutualism in France and in Italy: Union Harmonie Mutuelles and the National Society of mutual aid Cesare Pozzo.

Union Harmonie Mutuelles is a **network of mutual benefit societies** operating over a vast range within the the areas of health care by providing guarantees to more than **3 million people** protected by the health program.

The mutual for health **Cesare Pozzo** has been working in Italy since 1877, assisting over 300 thousand people in health and social care.

Union Harmonie Mutuelles and Caesar Pozzo have an efficient mutualistic model which benefits the community: health is a **universal right** and access to prevention and care should be available to everyone, with the people and their welfare at the center of importance.

The mission is defined: to build together with businesses and clients a new national mutual pole.

To achieve these goals Health Fund and its founders are betting on the values of mutuality and **of social cohesion**, the network of relationships.

With a double ambition, therefore:

- **accompany members** in the course of their lives and help them deal with the risks of existence
- be a **major player** in health and play a role in the social protection system

The patient is a partner, not a customer. The assisted is a member, not a client.
